

PAVAN KUMAR GUPTA

Senior Java Full Stack Developer | Java | Spring Boot | Microservices | Angular | Spring Batch
Noida, Uttar Pradesh, India | 9+ Years Experience | Payment & Finance | Risk & Insurance

PROFESSIONAL SUMMARY

Senior Engineer / Full Stack Developer with 9+ years of experience in web application development, specializing in Java, Spring Boot, Microservices, Spring Batch, Angular, multithreading, JPA and Hibernate. Experienced in designing and developing end-to-end solutions for large-scale financial, payment, risk and insurance platforms. Strong focus on maintainable code, performance optimization, production troubleshooting, database development, CI/CD and secure software delivery.

CORE COMPETENCIES

Backend	Java, Core Java, Multithreading, Spring Boot, Microservices, Spring Batch, JPA, Hibernate, JUnit
Frontend	Angular, AngularJS, ReactJS, RxJS
Database	Oracle, PostgreSQL, MySQL, SQL, Stored Procedures, Triggers, Indexing & Performance Tuning
DevOps / Tools	Jenkins, Jira, Git, Bitbucket, OpenShift, Harness, TeamCity, Gradle, Maven, SonarQube, Elasticsearch
Engineering	Parallel Streams, Asynchronous Processing, Code Quality, Production Support, Troubleshooting
OS	Windows, Linux

PROFESSIONAL EXPERIENCE

IRIS Software, Noida | Senior Engineer | Mar 2025 – Present

Client / Project: Citi Bank – CitiRisk Core / Credit

Credit Risk Limit & Exposure Monitoring Platform used to track counterparty credit limits, exposures and concentration risk. The platform processes high-volume limit-utilization data, applies configurable business rules across risk themes, and exports enriched risk metrics to databases and files for regulatory reporting and limit-breach monitoring.

- Developed Spring Batch export components to transform limit-utilization data into structured objects for persistence and reporting.
- Implemented configurable, rule-based filtering across multiple risk themes.
- Built utilization-percentage, usage-level and RAG-status calculation logic.
- Optimized large-dataset processing using parallel streams and asynchronous ID generation.
- Enriched risk data with concentration-risk indicators for regulatory reporting.
- Improved batch export performance through parallel processing and delivered reusable common export logic.
- Worked with Java, Spring Batch, Guice dependency injection, Lombok, Oracle JDBC/SQL mappers, Gradle, Maven, Git and SonarQube.
- Ensured code quality through static analysis, unit testing and secure coding practices.

IBM, Noida | Application Developer | Mar 2022 – Jan 2025

Client / Project: Blue Cross Blue Shield of Massachusetts – Electronic Self Service (ESS)

ESS is a secure online health-plan self-service platform for Blue Cross Blue Shield of Massachusetts in the Health & Insurance domain.

- Developed front-end, middleware and back-end Java web applications using Java and Angular.
- Used Angular to enhance user interfaces and deliver application functionality.
- Worked with Jira and Jenkins in an Agile delivery environment.

GlobalLogic India Pvt. Ltd., Noida | Associate Consultant | Oct 2018 – Mar 2022

Client / Project: Entrust – EMV & Key Manager

Secure EMV chip-card personalization platform covering data preparation, cryptographic key management, personalization and audit/logging services, with a focus on EMV standards and secure processing.

- Developed and maintained high-performance Java applications and dynamic Angular front-end components.
- Implemented RxJS for asynchronous operations and state management.
- Designed, developed and optimized relational database schemas and SQL across Oracle, MySQL and PostgreSQL.
- Worked on SQL queries, stored procedures, triggers, database migrations, indexing and performance tuning.
- Configured and maintained Jenkins CI/CD pipelines for automated builds, testing and deployment.
- Troubleshot build failures, deployment issues and production defects; analyzed logs and implemented timely fixes.
- Collaborated with DevOps teams for smooth software integration and releases.

Bureau Veritas Consumer Products, Noida | Software Engineer | Apr 2017 – Oct 2018

Client / Project: Bureau Veritas Consumer Products – BVLabNg

BVLabNg is an internal web-based laboratory testing application designed to manage and automate testing processes across various product categories. The platform supports test execution, result analysis and compliance tracking.

- Worked on Change Requests and production issues using AngularJS and Java Spring.
- Contributed to design and development activities for the web-based laboratory information management system.

NetSutra, Noida | Software Engineer | Dec 2015 – Mar 2017

Client / Project: TeacherMatch – Teacher Job Portal

TeacherMatch was a teacher job portal. Worked on Change Requests, new features and production issues using Java, JavaScript, DWR and Spring MVC.

- Worked on Change Requests (CRs) and new feature development.
- Handled production issues and supported application fixes.
- Developed and maintained functionality using Java, JavaScript, DWR and Spring MVC.

EDUCATION & CERTIFICATION

- B.Tech, Computer Science — Chaudhary Charan Singh University, Meerut | Jun 2010 – Jun 2014
- Oracle — Java Certification: AZ0-808 | Mar 2025 – Apr 2099 (as listed in source resume)

DOMAIN EXPERIENCE

Payment Process & Finance | Credit Risk | EMV & Card Personalization | Health Insurance | Laboratory Information Management | Recruitment / Job Portal
